IN THE CLAIMS:

Please amend independent Claims 1, 6, 11 and 16 as shown below.

1. (Currently amended) A method of exporting file systems comprising the steps of:

consulting a file associated with a mount point of a mounted file system to retrieve needed information to export the file systems, the mount point being the point at which the file systems are mounted on a computer system; and

exporting the file systems.

- 2. (Original) The method of Claim 1 wherein the needed information is names of devices within which the file systems are located.
- 3. (Original) The method of Claim 2 wherein the file systems are exported without first being mounted.
- 4. (Original) The method of Claim 3 wherein the file is an extended attribute file.
- 5. (Original) The method of Claim 4 wherein each mount point has an extended attribute file.

6. (Currently amended) A computer program product on a computer readable medium for exporting file systems comprising:

code means for consulting a file associated with a mount point of a mounted file system to retrieve needed information to export the file systems, the mount point being the point at which the file systems are mounted on a computer system; and

code means for exporting the file systems.

- 7. (Original) The computer program product of Claim 6 wherein the needed information is names of devices within which the file systems are located.
- 8. (Original) The computer program product of Claim 7 wherein the file systems are exported without first being mounted.
- 9. (Original) The computer program product of Claim 8 wherein the file is an extended attribute file.
- 10. (Original) The computer program product of Claim 9 wherein each mount point has an extended attribute file.
- 11. (Currently amended) An apparatus for exporting file systems comprising:

AUS920010866US1

means for consulting a file associated with a mount point of a mounted file system to retrieve needed information to export the file systems, the mount point being the point at which the file systems are mounted on a computer system; and

means for exporting the file systems.

- 12. (Original) The apparatus of Claim 11 wherein the needed information is names of devices within which the file systems are located.
- 13. (Original) The apparatus of Claim 12 wherein the file systems are exported without first being mounted.
- 14. (Original) The apparatus of Claim 13 wherein the file is an extended attribute file.
- 15. (Original) The apparatus of Claim 14 wherein each mount point has an extended attribute file.
- 16. (Currently amended) A computer system for exporting file systems comprising:

at least one storage device for storing code data; and

at least one processor for processing the code data to consult a file associated with a mount point of a mounted file system to retrieve needed information to export the file systems, the mount point being the

AUS920010866US1

point at which the file systems are mounted on a the computer system, and to export the file systems.

- 17. (Original) The computer system of Claim 16 wherein the needed information is names of devices within which the file systems are located.
- 18. (Original) The computer system of Claim 17 wherein the file systems are exported without first being mounted.
- 19. (Original) The computer system of Claim 16 wherein the file is an extended attribute file.
- 20. (Original) The computer system of Claim 19 wherein each mount point has an extended attribute file.
